## DETAILED ACTION

### *Claim Objections*

Claims 33 and 38 are objected to because of the following informalities:

Claim 33, line 2 states "ISND". This should be changed to --ISDN--.

5 Claim 38, line 2 states "pint". This should be changed to --point--.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

10 The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

15 Claims 21-40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Independent claims 21, 32, and 36 all  
20 disclose "interworking function (IWF)". There is no mention of an "interworking function" or "IWF" in the specification, nor is there any suggestion of what an "IWF" might be or how it operates within applicant's invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

25 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 30 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 30 recites the limitation "said third termination point" in lines 3 and 4.

5 There is insufficient antecedent basis for this limitation in the claim.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hamalainen et al. (U.S. Patent 5,802,465) discloses a packet  
10 network using IWF communicating over an circuit switched network. Kung et al. (U.S. Patent 6,252,952 B1) discloses a communication system and call setup between two entities of the system, where part of the setup involves the ISUP command. Ejzak et al. (U.S. Patent 6,721,565 B1) shows the communication setup and system between a packet based network and circuit switched network using media gateways and control  
15 functions. Foodeei et al. (U.S. Patent 6,445,696 B1) shows a network connected to a variety of other networks via IWFs.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP  
20 § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2661

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
